

J.A.W. Chlorine Reagent Sets for Hach® CL-17 and HF scientific CLX Chlorine Analyzers

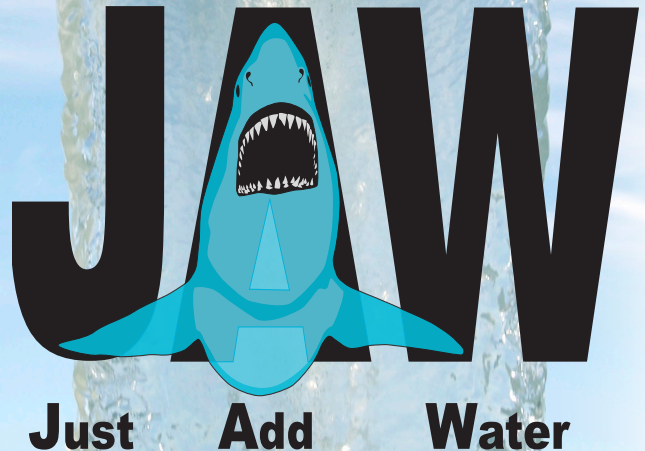

JUST ADD WATER!

Reagent sets are specifically designed by HF scientific for use in the Hach® CL17 and CLX Online Chlorine Analyzers, and have been proven accurate in side by side studies. Reagents are shipped dry in the bottle. Just add DI water and they are ready for use!

- **Just Add Water**
- **5 Year Shelf Life**
- **Convenient Storage**
- **Up to 20% Savings***

Eliminate the hassle of monthly reordering and save money by ordering a 1 year set (up to 20% savings as priced in Hach® 2011 catalog)*. Since the reagent is in powder form it can be stored where convenient without the worry of freezing or spillage.

*When compared to ordering 12-30 day Hach® kits
