

Spectrophotometers and Colorimeters

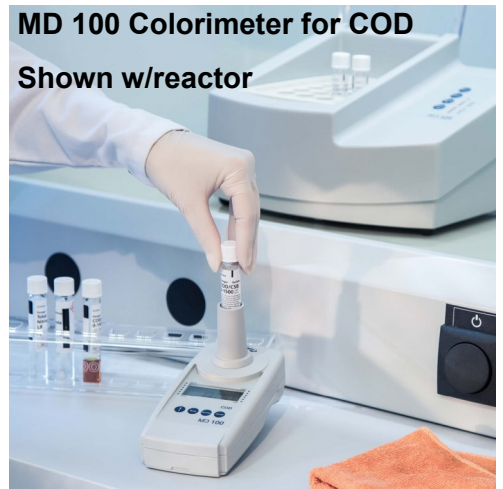

MD 600 Series Multi Parameter Colorimeter

Lovibond Spectrophotometers and Colorimeters offer high quality measurement, ease of use and lower cost reagents. Manufactured in Germany but distributed and serviced from Sarasota, FL. Many popular reagents are manufactured in Sarasota. Lovibond offers the best option for colorimetric measurement for water and wastewater. Contact our office for specific pricing and reagent choices. Pricing is **ALWAYS** lower than the traditional choice for photometric measurement. Florida shipping by UPS ground is next day delivery for stock items.

XD 7000 Series Spectrophotometer

The XD series includes both UV/VIS (XD 7500) and VIS (XD 7000) versions. Easy to set up and easy to operate, these units are the new standard in municipal water and wastewater spectrophotometric testing. Multiple wavelengths, multiple path-lengths and pre-configured test methods are just a few of the features offered by the XD series. For details contact our office!
